

CENTRE POINTE COLLISION CENTER

Simple, clean-cut lines juxtaposed with a sweeping curved glass wall give this building a striking impression. The commanding main entryway, composed of glass and steel, arcs around the tilt-up walls and comes to a startling point, creating an intriguing space. The

roof line follows the arc gently, without distracting the eye from the focal point of the building. Located in the Centre Pointe Business Park, this building has comfortable office spaces situated in the front of the building, and a large interior garage takes up the rest of the space.
