

PARKWAY HUMMER DEALERSHIP

Soaring dynamic lines and spaces in the architecture of this Hummer Dealership serve to express the excitement of the vehicle! The 15,000 square foot sales and service facility is topped off with an arc-shaped roof containing clerestories that create a dramatic interior space, brightly

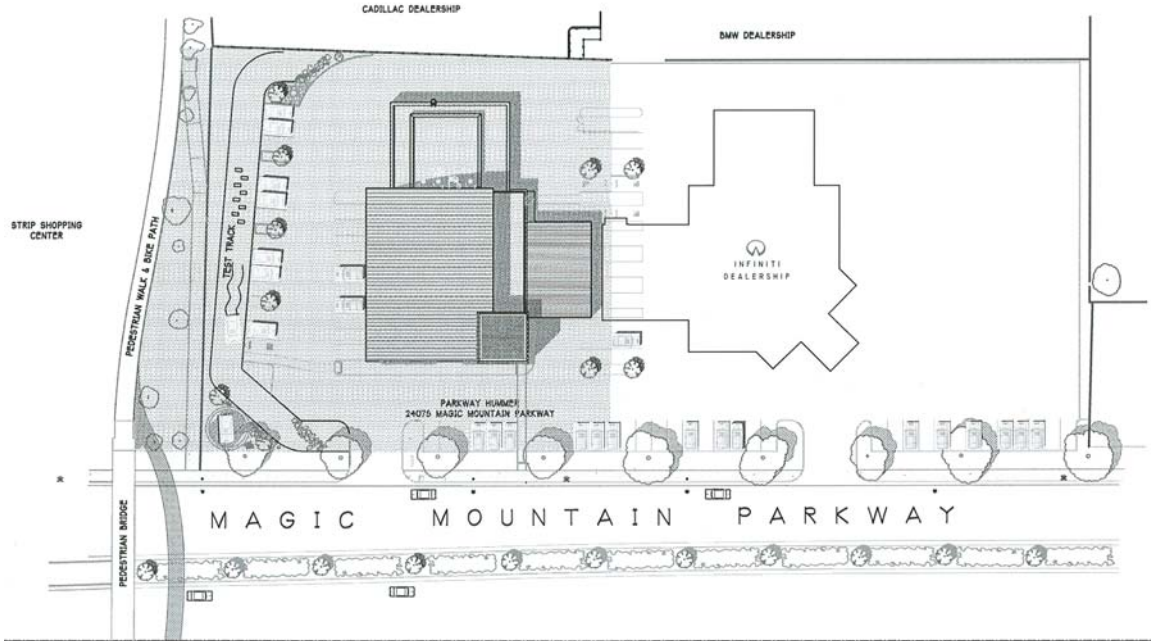

illuminating the Hummers with daylight, playing on the Southern exposure. A corner tower acts as a vertical counterpoint to the arc and showcases the new vehicle area. An on-site test track is also designed to give customers a demonstration ride across rough terrain and steep slopes.

The gently curved roof heightens and lightens the interior showroom by allowing in generous amounts of vertical light during the day. The showroom is additionally lighted with theater style spotlights focusing on showcased vehicles for a dramatic effect.
